Certified Measurement & Verification Professional®

An Industry Recognized Certification for Energy Efficiency, and M&V Professionals.

Who are Measurement & Verification Professionals?

- Are you an energy manager looking to validate your energy savings?
- Are you a consultant that specializes in the energy performance of your clients' buildings and facilities?
- Are you a building owner or manager looking to manage an M&V team or understand how energy savings can finance your next project?
- Are you involved in designing industrial processes or new buildings?

A Certified Measurement & Verification Professional® (CMVP®) is an individual who manages or performs internationally recognized methods of quantifying the energy usage impacts of energy management activities. They apply the fundamental concepts of performance and savings verification in a wide range of contexts, including energy savings performance contracts and utility/government incentive programs. A CMVP® can often help a company confidently and cost-effectively implement cost saving activities through clear communication with project partners.

What does the Certified Measurement & Verification Professional (CMVP®) Certification Program offer?

This program helps educate and qualify individuals to learn and apply the fundamental concepts of all modern "M&V" standards, guidelines, and protocols. The CMVP® Certification provides proof that the individual has gained an understanding of the critical issues surrounding implementation of M&V theory. The program raises the professional standards, both technical and ethical, of those engaged in energy efficiency and energy performance measurement and verification.

What is the bottom line for me or my company?

Gaining a wide-reaching and industry-recognized certification is always a personal and financial investment. Since its inception in 2002, the CMVP® certification program has demonstrated its validity year after year. Individuals already engaged in energy efficiency report career improvements in the form of salary and responsibility increases. The certification shows a fundamental understanding of the industry and a commitment to their career. Companies, organizations, and consultants with a CMVP® on-staff often see a higher affinity with their customers because CMVP®s understand their customer's requirements, speak the language of M&V, and are trusted to report and validate energy metrics and potential savings.

What functional areas does the CMVP® Certification Program cover?

The certification program requires fundamental knowledge across several core principles and practices specific to measuring, verifying, and reporting energy performance. These include:

- Basis for Adjustments
- Fundamental Performance Verification Approaches
- Retrofit Isolation Approach to M&V
- Whole Facility Approach to M&V
- M&V Planning
- Savings Reporting
- Metering and Considerations
- Modeling Concepts and Application
- The professional CMVP®

How do I become eligible for AEE's CMVP® certification?

Every certification program offered by AEE is defined by strict standards to ensure the program maintains its industry-wide recognition and credibility. To that end, AEE stipulates three criteria that all CMVP® candidates must meet. Firstly, applicants must have relevant experience or educational credentials (see below). Secondly, candidates must undergo a defined training program that aligns with the fundamental knowledge base of the program, and the principles and practices of the industry as a whole. Thirdly, candidates must pass the associated exam to demonstrate their technical knowledge, proficiency, and abilities in the area of energy efficiency.

Experience & Education

Applicants must meet one of the following eligibility criteria:

- Bachelor degree* from an accredited college or university in science, engineering, architecture, business, law, finance, or related and 3+ years related** experience
- Registered Professional Engineer (PE) or Registered Architect (RA) and 3+ years related** experience
- Bachelor* unrelated degree from an accredited college or university in a field not specified above and 5+ years related** experience
- 2-year technical degree* and 5+ years related** experience
- 10+ years related** experience
- Current status of Certified Energy Manager® (CEM®) or Certified Energy Auditor (CEA™) and 1+ year related** experience

*Or equivalent degree

**Related experience in energy management projects involving measurement and verification.

IPMVP® is a registered trademark of the Efficiency Value Organization

Why would I want to take a training program when I believe I already have the knowledge and experience required to pass an exam?

The CMVP® Training program provides more value than only preparing individuals to take the associated exam. It brings all candidates to a base level of understanding of M&V essentials and improves their ability to communicate core concepts with project partners, thereby eliminating potentially disruptive misunderstandings. Candidates learn how to apply the core M&V program concepts, protocols and frameworks to a wide variety of facilities, including existing and new buildings and industrial processes.

For those entrenched in their normal daily activities, attending a training program, held away from the office, in a classroom environment can be a catalyst for improvement and change. For many, the chance to network, connect, and learn from other like-minded individuals is incredibly valuable.

I obtained my CMVP® Certification, where do I go next?

The CMVP® certification can help define your status as an M&V professional and help progress your career. Once complete, make sure you maintain your account and keep track of your certification on aeecenter.org. You can also keep up to date on energy management practices and technologies by joining your local AEE Chapter. Energy professionals continuously tell us that they stay ahead in the industry by getting involved in their local community.

Which companies and industries value an AEE certification?

You can find AEE certified professionals across markets and industry sectors, from utilities, ESCOs, major multi-national corporations, power companies, respected controls contractors, and manufacturers, to federal, state, and local governments, military, universities, and school boards. Many of these organizations require a certification as a condition of hiring or a requirement for advancement. Government organizations request certified professionals within "Requests for Proposals." The following list is a sample of companies across a wide range of industries that have demonstrated they value AEE certified professionals.

- 3M
- 3M Canada
- Abbott Laboratories
- AK Steel
- ALCOA
- Alliance to Save Energy
- American Axle & Manufacturing
- Amgen
- Anheuser Busch
- ArcelorMittal
